#### A WORD FROM THE PASTOR

Although much more common in lower life forms as high as wasps, there are at least 80 species of vertebrate up through some reptiles and some fish, which can reproduce without a male female relationship.

This process is known as parthenogenesis, meaning creation of life outside of normal female/male relationship and harks back to the Greeks, who built the Parthenon a temple for their goddess, Athena Parthenos (“Athena the Virgin”) It was famous for their temple prostitutes who gave birth without a husband. This Prostitution was a form of income for the temple. Now you know!
